FACILITATING THE DIGITAL METAMORPHOSIS OF ORGANISATIONS

April 2026

Izertis at a glance

We are a technology consulting firm that helps organisations in their **Digital Metamorphosis** process.

Our differentiation is based on our **portfolio** of services and cutting-edge technologies, and on our modern, agile, innovative and flexible **culture**.

Lines of business

Software Engineering

We design and build secure, scalable digital platforms and products, integrating quality, automation, and AI from the design stage.

Digital Platforms | Cloud & Mobile Applications | AI-Driven Development | Intelligent Agents | Quality Engineering | Phygital Solutions | Financial Tech Services

Consultancy & Governance

Strategic support for CIOs, CISOs, CTOs and business unit leaders to define and implement their digital transformation, aligning technology, processes and people with the organisation's objectives.

AI Strategy and Adoption | Operational Efficiency | IT Governance | Portfolio, Program and Project Management | Change Management | PPM/ESM/ITSM Solutions | Regulatory Compliance

AI & Data

We turn data and artificial intelligence into real drivers of growth and competitive advantage through scalable architectures, high-impact use cases, and a responsible AI-by-design approach.

AI Readiness | Agentic AI | Applied AI | Trusted AI | Data Platforms | AI & Data Governance | Edge AI | Blockchain solutions

CX & Business Solutions

We create digital experiences and business solutions that connect data, technology, and customer insight to drive growth, improve commercial efficiency, and strengthen user relationships.

CRM Strategy & Implementation | UX & UI | Customer Experience | Digital Marketing & CRO | Brand & Creativity | Business Solutions

Cybersecurity

We design, modernise, and operate secure, scalable cloud infrastructures that are ready for artificial intelligence, ensuring operational continuity, cost control, and 24/7 managed services.

Secure Architectures | Cyber assessment | Audits | Pentesting | Network Team | Incident support

Cloud & Infrastructure

We protect organisations' critical assets through a comprehensive cybersecurity approach that combines prevention, detection, and response, with a strong focus on regulated and high-criticality environments.

Infrastructure Management | IT Modernisation | Cloud Architecture & Modernization | Hybrid Clouds | AI-Ready Infrastructure | Managed Services 24x7 | FinOps | Productivity & Communications

Software Engineering

We develop software aimed at improving the operational efficiency of companies, optimising and industrialising their processes. Our main flagships are security, quality assurance and the creation of seamless, high quality user experiences.

Tailor-made developments and maintenance

- Tailor-made software.
- Management of applications
- Digital cufflinks
- IoT solutions.
- Headless APIs
- Intelligent chatbots

Portals and e-commerce

- Corporate portals
- Customer portals
- Website factories
- Collaborative intranets
- E-commerce
- Integration platforms

Mobile Applications

- Development of apps.
- Mobile commerce
- Mobilisation of portals
- Wallets
- Wearables
- Management Apps

ECM / BPM

- Document management
- Scanning and capturing
- Intelligence and analysis.
- Process orchestration.
- Hyper automation of processes of processes
- Business collaboration.

Consultancy & Governance

Strategy & Digital Consulting

We design **IT strategies with a focus on the application of AI** based on consolidated methodologies.

IT Governance

We define and implement **organisational, management and governance models** to ensure the effective functioning of the technology areas.

Operating Efficiency

We analyse, redefine and optimise key organisational processes to **improve organisational performance and return on investment**.

Business Agility

We assist in the design and implementation of roadmaps to develop **agile capabilities at all levels** of the organisation.

Strategic Portfolio Management

We assist organisations in making decisions about their investments, through the implementation of project offices (EPMO), supporting them in strategic planning and control.

IT Service Management

We define and implement **Service Management models** from a strategic perspective, ensuring highly optimised production and delivery.

Management of Change

We facilitate the **real adoption** of new processes, methodologies, organisational changes and digital solutions, including the implementation of **Transformation Offices**.

PPM/ITSM/ESM solutions

We deploy **market-leading PPM/ITSM/ESM** tools to support and automate business processes.

Customer Experience & Business Solutions

With a customer-centric approach, we manage end-to-end digital projects, analysing the needs of each business and the trends and evolution of the markets. To do so, we develop digital assets in a comprehensive manner based on the personalisation of content through data and the use of disruptive technologies, with the aim of maximising our clients' digital profitability.

Our partnership with vendors such as Salesforce, Microsoft, Infor or SAP allows us to have a portfolio of intelligent business applications that maximise customer experience and minimise time-to-market.

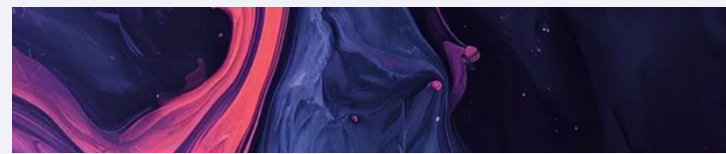

Customer-centric strategies

- Strategy
- User Experience
- Brand & Creativity
- Sales Growth
- Data Intelligence

Certified experts

We have a team of highly qualified and certified professionals in the leading CRM and ERP platforms.

Customised approach

We tailor our solutions to the specific needs of each company, taking into account its size, sector, culture and objectives.

Fast and efficient implementation

We guarantee a quick and seamless implementation, minimising the impact on the company's day-to-day business.

Cloud & Infrastructure

IT Modernisation

Consultancy and Audit: Analysing each business case from a holistic perspective - not simply technological - and providing a complete cross-cutting analysis of the organisation's needs.

- Audit
- Analysis
- Design
- Provision and deployment
- Implementation
- Optimisation

Productivity

Automation of application delivery, communications and integration processes.

Governance of Modern Workplace projects with a 360° vision.

- Modern Workplace
- Mobility
- Collaboration
- Unified communications
- User Experience monitoring

Hybrid Cloud

Cloud infrastructure as the basis for cloud computing.

Includes elements such as hardware, isolated resources, storage and network resources. Located in both hyperscale and private clouds.

- Architecture and design
- Performance monitoring and management
- Compliance and governance
- Data management
- Perimeter security

Managed Services

24x7 services to respond to immediate needs.

Constant optimisation and improvement.

- SPOC – Single Point of Contact
- Reception
- Incident lifecycle monitoring
- Scalability
- Metrics and reporting

Cybersecurity

Our 360° protection model offers a set of services that guarantee optimal security conditions, even in the most complex scenarios, for the deployment of a complete digital transformation strategy.

Defensive Cybersecurity

Architecture, hardening, authentication, continuity and resilience, ...

Proactive Cybersecurity

Preventive and offensive actions: auditing, inspections, Pentest, Red Team, DoS, DDoS.

Reactive Cybersecurity

IRT & Forensics: Takeover, adversary removal, post-incident, evidence preservation and analysis, ...

CISO Operation and Support

Cybersurveillance, security operation of the security subsystem, OTS

AI & Data

From data to decision: industrialised, governed and business-oriented AI

AI

We design build and operate AI solutions, from pilot to production.

Three solution families built on common foundation of adoption, governance and security.

AI Transformation & Adoption

AI strategy, prioritised (value-driven) use cases, change management and adoption.

AI Trust, Security & Compliance

AI governance, certification and regulatory compliance, traceability and auditability, risk models, responsible AI, security in GenAI and agents.

AgenticAI

Content generation.
Copilots and assistants.
Complex process automation.
Decision intelligence.
Human-AI interaction.

Applied AI

Machine Learning.
Computer Vision.
Digital twins.
Specialist models.

Edge AI

Tiny AI and on-device.
Real-time vision.
Autonomous edge systems.
EdgeOps & Lifecycle.

AI & Data Industrialisation

MLOps / LLMOps / DataOps.
End-to-end lifecycle.
Monitoring / FinOps.

Data

We design, build and optimise data management systems.

To turn data into decisions and into the foundation that powers AI.

Data architecture

Data strategy and model.
Architecture design (data mesh / fabric / lakehouse).
Integration and ingestion.

Data platforms

Platform build and operations,
Pipelines and processing.
Cloud and hybrid environments,

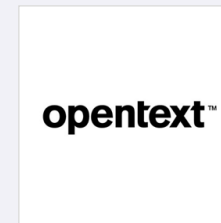

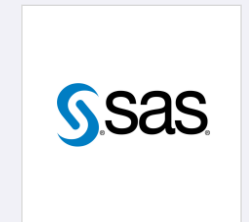

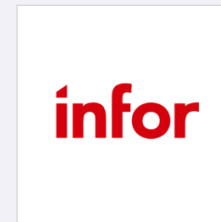

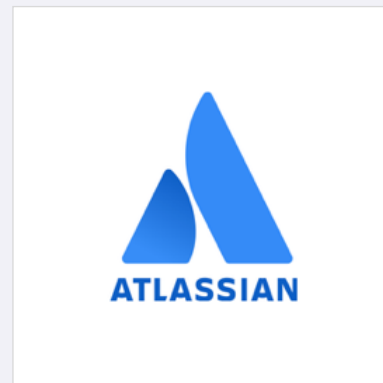

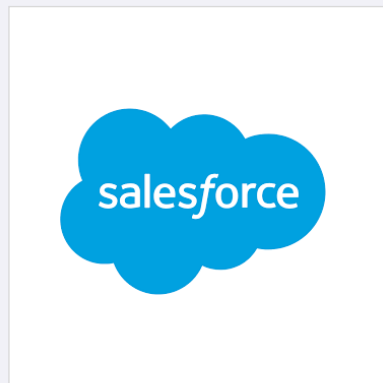

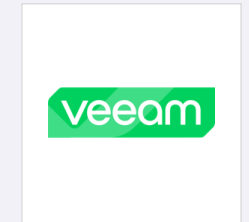

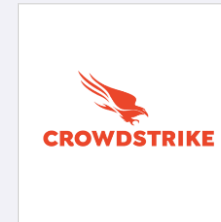

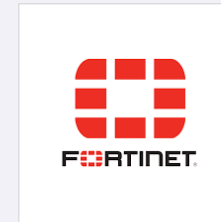

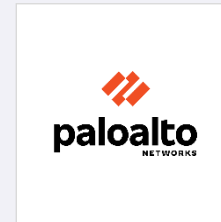

Data governance

Data quality.
Lineage and cataloguing.
Regulatory compliance.
Security and access control.

Visualisation and analytics

Dashboards and reporting.
Advanced analytics.
Self-service BI.
